

# HYDRA

The HYDRA is a discrete midi foot controller designed to ensure that your fly rig, or small gig rig, is as compact and reliable as possible.

With its tank like constructions and ease of use, the HYDRA is the new standard for MIDI controllers, while retaining the smallest possible footprint for fly date and tight pedalboard applications.

**Send Midi program changes (0-7)**

**Variable Midi Channel**

(rotary on back, down is 0, each click clockwise goes up to channel 16)

**Can be powered via a 9v AC or DC adaptor**  
(either polarity)

**7 pin midi socket**

(allows phantom power via outside pins)

#### WARRANTY
